Richland, WA 99352

Mr. William Adair  
Fluor Daniel Hanford, Inc.  
P.O. Box 1000, MSIN: H6-21  
Richland, WA 99352

Dear Messrs. Rasmussen and Adair:

Re: Dangerous Waste Compliance Inspection at the 222-S Laboratory Complex

The Washington State Department of Ecology (Ecology) identified six violations of Washington Administrative Code Chapter 173-303, Dangerous Waste Regulations, resulting from its September 27, 1996, inspection of the 222-S Laboratory Complex. The violations and corrective measures to remedy them were transmitted to the U.S. Department of Energy (USDOE) and its contractors via voluntary compliance letter dated November 7, 1996. A status of actions taken to correct these violations was reported in a November 25, 1996, letter from James Rasmussen, USDOE, and William Adair, Fluor Daniel Hanford, Inc. (FDHI). USDOE/FDHI's letter also requested additional time to complete corrective measures numbers one and four.

This letter serves to extend the compliance dates for corrective measure number one until March 3, 1997, and corrective measure number four until February 3, 1997. The 222-S Laboratory Complex must operate within the constraints of its existing Part A, form 3, until Ecology receives the revised form 3 from the facility. All other compliance dates remain as scheduled in Ecology's November 7, 1996, voluntary compliance letter.

If you have any questions, please contact me at (509) 736-3031.

Sincerely,

Bob Wilson, Compliance Inspector  
Nuclear Waste Program
